

Moon Phase Report for Jon Waldrup, prepared on 8/2/2012.

At the moment of your birth, the Moon was in Phase 9. So you have taken on a lifelong “commitment to allow yourself to love what is.” This represents a major theme for your whole life, and will show up in repeated challenges.

The Sun rules this phase and all Sun-ruled phases – both daily and progressed – are emphasized for you. Working towards the energy of the Sun’s position in your birth chart (see below) will always help you through challenging situations.

By progression, you are in Moon Phase 24 until July 28th, 2013. During this period you are especially working on your commitment to “wear out all your masks.” This is the overarching challenge during this time.

24 is a North Node phase so your subtle awareness of alignment is going to really help you at this time.

Your progressed North Node is in Scorpio 22. The energy of this degree will contribute to and modify the energy of every phase ruler you work with from now until July 28th of 2013.

Your natal and progressed phases are the most significant of the lunar month. It’s a good idea to know in advance when those will be, so you can schedule something special for the occasion.

Each New Moon, check the Moon Temple Oracle calendar to see when the Moon and the Phase Rulers will interact with your birth chart positions. What you learn to sense from these interactions will help you come into alignment with your truth-sense.

May you greet each New Moon with excitement!

Below is a list of the positions of the major planets and asteroids at the time of your birth. Please see the “*note on working with planet positions*” attached below for more information on incorporating these positions into your Moon Temple practice.
